CHAPTER I

TEAM GUIDELINES

1. Charter

This overhead organization is intended for use on [local incidents](#). For escaped fires expected to go project size, either a Type 2 or a Type 1 overhead team should be mobilized from the start. If this occurs, the Type 3 Team may be used to manage the incident during the escalation period. Once the incoming team is briefed, they will assume management of the incident.

This Plan will be reviewed and updated annually before April 30th by the FMO group, Forest Supervisor and Field Office Managers.

The ICT3, Zone Duty Officer and Forest Duty Officer are responsible for monitoring incident complexity and initiating the order process. If the incident exceeds Type 3 complexity, a Type 1 or 2 IMT will be ordered using Unit protocol.

If the Type 3 Team is assigned to a fire that begins to exceed its capability, the Type 3 Incident Commander(s) (IC) should recognize the need for an overhead team. The Type 3 IC will order an overhead team through the Line Officer. The order will be placed through the Central Idaho Interagency Dispatch Center.

On multi-jurisdictional incidents involving BLM and Forest Service, the Type 3 Team will normally be managed by one Incident Commander. On multi-jurisdictional incidents involving other entities, a Unified Command may be used. When more than two jurisdictions are involved, Agency Administrators will be encouraged to jointly sign a Delegation of Authority to a single IC, and designate Agency Administrator Representatives to serve as advisors to insure jurisdictional responsibilities and objectives are met.

2. Operational Area

IMT3's are available for immediate dispatch to any incident within the area protected by the agencies represented at the Central Idaho Coordination Center (CICC). An order for an IMT3 for out of area incidents will be considered if the local planning level is a 1 or 2.

3. Team Management

Central Idaho Interagency Type 3 Incident Management Team

Identification of appropriate management team members is essential for successfully meeting incident objectives. To provide safe and effective incident management the initial minimum overhead order for Type 3 Incidents will consist of the following positions:

- Incident Commander Type 3 (ICT3)
- Safety Officer (SOFR)
- Operations (OSC3)

Type 3 Incident Commanders will not serve concurrently as a single resource boss or have any non incident related responsibilities. (2009 Interagency Standards for Fire and Fire Aviation Operations, 11-4)

- a. The Agency Administrator, Zone Duty Officer, and the ICT3 will work together to determine the ICS positions that need to be filled to meet incident objectives and ensure the safety of assigned resources and the public, Assigned resources will meet the minimum Type 3 competencies found in the 2010 REDBOOK CH.11, P.4. Single resources such as ICT3 can be ordered without mobilizing the team. Special consideration should be given when doing this to mitigate span of control, and safety oversight.
- b. All team members will meet the minimum qualifications as stated in the Interagency Standards for Fire and Aviation (Redbook). Home agencies are responsible for screening candidates for team positions to ensure all qualifications are met.
- c. Incident Commanders (IC's) will provide performance evaluations for team members and assure task books are completed. They may initiate removal action for team members for inadequate performance.
- d. **The primary required team members are expected to make a weekly commitment to their assignment on each Monday morning conference call. This will be tracked through CICC.**
- e. **Each individual is responsible for tracking their availability.**
- f. The agency administrator will prepare the **Wildland Fire Decision Support System (WFDSS)** for wildland fire incidents to present to the incident commander along with a delegation of authority for managing the incident. The IMT3 is designed to assemble rapidly on a growing incident to start the process of organizing. Therefore, there are two options for activating the team: dispatch directly to the incident, or assemble it at a briefing location.
- g. Maximum consecutive length of assignment for team is 14 days, less travel.

CHAPTER II

MOBILIZATION

1. The IMT3 will be ordered through CICC.
2. CICC will manage rotation schedules (if applicable) and call-ups.
3. IC's will be the central contact point for team business, including the substitution of team members. IC's will coordinate with CICC.
4. Information necessary from the ordering unit to CICC when ordering the team includes:
 - a. Incident name.
 - b. Incident location.
 - c. Designated assembly point/line officer's briefing location and what team positions are requested.
 - d. Time of line officer's briefing.
 - e. Name of agency administrator or official conducting briefing.
 - f. Telephone number(s) of ordering unit.
 - g. Name of contact person at ordering unit.
 - h. Other pertinent information regarding mobilization order.

Central Idaho Interagency Type 3 Incident Management Team

5. IMT3 will be placed in available status beginning the last Monday of June at 0001 and end rotation as agreed upon by the Salmon BLM AFMO and the Forest Fire Management Officer on the SCNF.

6. CICC will mobilize off current team rosters, and use the trainee priority list, and qualified personnel from ROSS. Mentor/trainers will be mobilized as needed on a case-by-case basis.

7. Command and General Staff personnel will notify CICC of changes in their availability. Team members have the responsibility to notify their respective IC and CICC of their availability.

8. Briefing should be scheduled between the ordering Agency Representative and the team. If possible, this briefing would be conducted at the Host Agency Office.

DEMOBILIZATION

1. The Team will demobilize as a Team unless special circumstances exist. The IC(s) will approve any special demobilization. Emphasis should be placed on identifying resource needs well in advance and releasing unneeded resources in a timely manner.
2. Transition to or from either a Type 2 or Type 1 IMT or back to the responsible agency, should be well coordinated and may require the Team to remain on the incident for an additional operational period.

CHAPTER III

AGENCY ADMINISTRATOR/REQUESTING UNIT RESPONSIBILITIES

1. The responsible line officer for the unit on which the incident exists is the agency administrator. Unless further delegated, the agency administrator will be:
 - a. District Ranger for single Ranger District incidents; Forest Supervisor for multi-Ranger District incidents.
 - b. Field Office Managers for BLM Districts; District Manager for multi-Field Office incidents.
2. The agency administrator, upon recommendation from the respective duty officer, orders an IMT3 when the requirements of managing the incident threaten to, or exceed the capabilities of the local initial attack organization. Current incident complexity guidelines (refer to 2006 Incident Response Pocket Guide, page 18) will be used to order or adjust team type, so the IMT3 may manage an incident until transition with another team or until the incident is over for short duration incidents.
3. If the incident is projected to go beyond one operational period, in containment phase, the agency administrator will prepare a WFDSS for the wildland fire incident to present to the ICT3 upon delegating responsibility for managing the incident.
4. The agency administrator retains jurisdiction of the incident and responsibility for actions taken in managing it. The agency administrator delegates authority, in writing, to the IC for managing the incident.
5. The agency administrator(s) will direct the activities of the team through delegation of authority and WFDSS. The delegation will address the following, but are not limited to:
 - a. Selection of strategy.
 - b. Public and firefighter safety.
 - c. Finance procedures, cost efficiency and fiscal constraints.

Central Idaho Interagency Type 3 Incident Management Team

- d. Incident information flow and protocols
 - d. Use of local resources.
 - e. Use of trainees.
 - f. Demobilization schedule and procedures.
6. The agency administrator should appoint a resource advisor to work with the team if needed.
 7. Decision for additional team members and mobilization will be negotiated between the IC and agency fire management personnel. Span of control should address incident segments or divisions required to effectively manage the incident.
 8. The agency administrator may establish objectives for managing the incident and will provide those in writing to the IC in the delegation of authority. If the team is dispatched directly to an emerging incident, the agency administrator must approve a short delegation of authority when the team is mobilized.
 9. The IMT3 will involve Agency Administrator with first full team planning meeting.
 10. The agency administrator will conduct a closeout meeting with the ICT3 or IMT3 and provide a team performance evaluation to the IC before the release of the team.

CHAPTER IV

INCIDENT COMMANDER/INCIDENT MANAGEMENT TEAM RESPONSIBILITIES

- Understand the specific performance expectations and duties for the Command and General Support position that an individual is fulfilling including job aids.
- Provide the organizational needs of communications, coordination, & cooperation between team members.
- Understand and are capable of participating in the Planning Process.
- Have a working knowledge of the duties and responsibilities for all functional areas.
- Possess an understanding and the need to maintain Situational Awareness.
- Implement sound Objectives, Strategies, and Tactics for Safe, Effective, and Efficient Incident Management.

Incident Commander/Unified Command

The IC responsibilities include: identifying the core team members, coordinating with the Agency Representatives, and ensuring Agency objectives and strategies are implemented. The ICs are responsible for all positions not filled or delegated such as Safety Officer and Demobilization Unit Leader. The IC(s) should delegate and clarify assignments to other team members and personnel. The IC(s) are responsible to ensure a smooth transition if a Type 1 or Type 2 IMT is ordered and transition back to the local unit. Prepare the Returns Of Delegated Authority. The IC(s) are responsible for seeing that other Team members do not exceed a formal span of control. The IC(s) should monitor other positions, make recommendations in filling additional positions, and monitor the work/rest ratio for the Team.

Safety

The Safety Officer is responsible for assessing hazardous and unsafe situations and developing measures for assuring personnel safety. The Safety Officer will correct unsafe acts or conditions through the regular line of authority although the Officer may exercise emergency authority, to stop or prevent unsafe acts when immediate action is required.

Operations

The Operations Chief reports directly to the IC(s) and is responsible for the management of all operations in relation to the incident objectives. May act as Staging Area Manager, Air Operations Director, or fill various other Operational functions. The Operations Chief is responsible for managing span of control and initiating orders for additional resources if needed. When practical, personnel already assigned to the incident should be used in filling various positions if they have the necessary qualifications.

Plans

Central Idaho Interagency Type 3 Incident Management Team

This position is responsible for the collection, evaluation, distribution and use of information about the development of the incident, status of resources, and demobilization of the incident. Plans supervises preparation of the Incident Action Plan, conducts planning meetings, establishes check in and resource status tracking, and prepares recommendations for release of resources. Consider ordering a Fire Behavior Analysis (FBAN), if needed.

Finance

This position is responsible for posting personnel and equipment time, commissary, and providing cost analysis for the incident. A supply of necessary forms may be found in a Finance Starter Kit that should be included with the initial supply order. (Reference Attachment 5 for contents). Reference the Interagency Incident Business Management Handbook (IIBMH) for clarification in filling out reports. This position coordinates closely with the Incident Business Advisor. It is strongly suggested that the responsible agency supplies the Finance Section chief (FSC) or provides agency oversight.

Logistics

This position is responsible for providing facilities, services, and material in support of the incident. This may include setting up the base camp, arrangement of food, water, sanitation, sleeping areas, and first-aid unit. Ordering of resources, accountability of property items and equipment, providing transportation, communications, and security are major functions of this position. It is critical that a workable span of control be established and lower level positions filled early, preferably with personnel already on the fire. Logistics must work closely with the IC(s) and Operations in consolidating orders. (Reference Attachment 5 for initial order team kit inventory). All resources are ordered through regular dispatch channels.

Information Officer

The Information position is responsible for the formulation and release of information about the incident to the news media, incident personnel, and other appropriate agencies and organizations. This should be closely coordinated with the IC(s).

Communications

This position is responsible for developing plans for the effective use of incident communications equipment and facilities; installing and testing communications equipment. The communications position will distribute communication equipment to incident personnel, as needed, and is responsible for maintenance, repair, and tracking of communications equipment.

Trainee

This position is designed to give the trainee valuable exposure to specific Team positions. The goal is to qualify the trainee to a functional position within the Team in the future. Trainee positions are negotiated with the Agency Representative.

The following chart illustrates the minimum qualifications required for individuals performing Type 3 complexity functions:

Type 3 Functional Responsibility	Specific 310-1 or equivalent qualification standards required to perform ICS functions at Type 3 level
*Incident Command	Incident Commander Type (ICT3)
*Safety	Line Safety Officer
*Operations	Strike Team Leader or Task Force Leader
Division	Single Resource Boss
Plans	Local entities can establish level of skill to perform function.
Logistics	Local entities can establish level of skill to perform function.

Central Idaho Interagency Type 3 Incident Management Team

Information	Local entities can establish level of skill to perform function.
Finance	Local entities can establish level of skill to perform function.

* Minimum required positions for type 3 incidents

APPENDIX D: ELEMENTS OF TYPE 3, 2 AND 1 FIRES

Incident Command	Description / Criteria	Number of Personnel guideline	Complexity	Management consideration / action
Type 3	<p>May involve multiple operational periods prior to control.</p> <p>Requires a written action plan.</p> <p>Incidents may be divided into divisions, but complexity/span of control do not require division/group supervisor.</p> <p>Resources vary from several single resources to several task forces/strike teams.</p> <p>Staging area and base camp may be established.</p>	6-200	<p>High Complexity</p> <p>Fire may be on multi-jurisdiction with multi-agency response to the incident.</p> <p>A unified command may be set up.</p> <p>Several aviation resources may be needed for a longer duration to bring the fire under control.</p> <p>May involve urban interface situations.</p> <p>May be used as a transitional management organization until relieved by a Type 1 or 2 Incident Management Team.</p> <p>These fires generally occur when the Unit is in Preparedness Levels 3, 4, and 5.</p>	<p>A written Delegation of Authority is required.</p> <p>Incident Command Post identified.</p> <p>Wildland Fire Situation Analysis needs to be completed by the Line Officer and their staff.</p> <p>Line Officer briefings need to be conducted.</p> <p>Complexity analysis will be conducted.</p> <p>If the criteria and complexity are greater than what is described, a higher level Command organization should be ordered and transition should take place with the Type 3 IC.</p> <p>The Line Officer or Fire Staff Officer must be notified of any changes in Command of the Fire.</p>
Type 2	<p>May involve multiple operational periods prior to control.</p> <p>Requires a written action plan.</p> <p>Incident is usually divided into divisions.</p> <p>Operations personnel normally do not exceed 200 per operational period and total incident personnel do not</p>	200-500	<p>Fire may be on multi-jurisdiction with multi-agency response to the incident.</p> <p>A unified command may be set up.</p> <p>Several aviation resources may be needed for a longer duration to bring the fire under control.</p> <p>May involve urban interface situations. Some structures may have been lost but the risk to lose more homes is low to moderate.</p>	<p>Written Delegation of Authority is required.</p> <p>Incident Command Post identified.</p> <p>Wildland Fire Situation Analysis needs to be completed by the Line Officer and their staff.</p> <p>Line Officer briefings need to be conducted.</p> <p>Complexity analysis should be conducted.</p>

Central Idaho Interagency Type 3 Incident Management Team

Type 2	<p>exceed 500.</p> <p>Some of the Command and General Staff positions may be activated.</p> <p>Many of the functional units are needed and staffed.</p>		<p>May be used as a transitional management organization until relieved by a Type 1 Incident Management Team.</p> <p>These fires generally occur when the Unit is in Preparedness levels 3, 4, and 5.</p>	<p>If the criteria and complexity are greater than what is described, a higher level Command organization should be ordered and transition should take place with the Type 2 IC.</p> <p>The Line Officer or Fire Staff Officer must be notified of any changes in Command of the fire.</p>
Type 1	<p>May involve multiple operational periods prior to control.</p> <p>Requires written action plan.</p> <p>Incident is usually divided into divisions.</p> <p>Operations personnel normally do not exceed 500 per operational period and total incident personnel do not exceed 1000.</p> <p>Some of the Command and General Staff positions may be activated.</p> <p>Many of the functional units are needed and staffed.</p>	500-1000+	<p>Fire may be on multi-jurisdiction with multi-agency response to the incident.</p> <p>A unified command may be set up.</p> <p>Several aviation resources may be needed for a longer duration to bring the fire under control.</p> <p>May involve urban interface situations.</p> <p>Several structures may have been lost with the risk of losing several more being high or greater.</p> <p>These fires generally occur when the Unit is in Preparedness levels 3, 4, and 5.</p>	<p>Written Delegation of Authority is required.</p> <p>Incident Command Post identified.</p> <p>Wildland Fire Situation Analysis needs to be completed by the Line Officer and their staff.</p> <p>Line Officer Briefings need to be conducted.</p> <p>Complexity analysis should be conducted.</p> <p>The Line Officer or Fire Staff Officer must be notified of any changes in command of the fire.</p>

Central Idaho Interagency Type 3 Incident Management Team

APPENDIX E: IC Daily Incident Review

Daily IC Incident Review

Incident Commander _____
Fire Name and No. _____
Start Date and Duration of Incident _____
Date of Incident Debriefing _____
List of Debriefing Attendees: _____

Brief synopsis of fire behavior and narrative of the incident:

Fire Size-up:

- Gave an accurate sizeup of the fire to dispatch upon arrival?
- Managed fire suppression resources in accordance with the management objectives for the area and availability of resources?
- Did the unit support organization provide timely response and feedback to your needs?
- Were there any radio communication issues?

Provide for the Safety and Welfare of Assigned Personnel:

- Gave operation briefing prior to firefighters being assigned to incident operations.
- How were incoming resources debriefed; via radio, personal contact?
- Were agency work/rest guidelines followed?
- Was adequate food and water provided to firefighters?

Fire Suppression Operations:

- Explain how the strategies and tactics used met management objectives, without compromising adherence to the Fire Orders, Watch Out Situations, and LCES?
- How were weather conditions monitored: daily weather briefings, spot weather forecasts or other?
- Were there adjustments needed to strategy and tactics?
- What were the potentially hazardous situations, and their mitigations?
- How were projected changes in the weather, tactics, hazards and fire behavior communicated to fire personnel?
- Were communications effective with dispatch and supervisor?
- Were all interested parties kept informed of progress, problems, and needs. Was aviation support used? If so, was it effective?
- Were there any injuries, close calls, or safety issues that should be discussed? Were these documented?

Administrative Responsibilities:

- Submitted complete documentation to supervisor for time, accidents, incident status, unit logs, evaluations, and other required or pertinent reports?
- Provided timely and effective notification of the fire status and unusual events or occurrences to dispatch and management.
- As requested, provided effective input into the **Wildland Fire Decision Support System (WFDSS)**
- If necessary, provided team transition briefing as assigned.
- Form ICS 201 was completed in accordance with local policy.

Central Idaho Interagency Type 3 Incident Management Team

APPENDIX G: 30 Mile Abatement Plan Incident Commander Responsibilities

Action	Documentation Required
Make safety of firefighters and the public the highest priority. When a potentially life-threatening situation exists, supersede natural and cultural resource considerations if necessary to provide for safety.	No
Prepare a complexity analysis on each wildland fire at the time of initial attack as part of the size up.	Yes
Ensure all firefighting actions are in full compliance with the Ten Standard Fire Orders and mitigation of the applicable Watch Out Situations has been accomplished.	No
Ensure arriving ground fireline resources on Type 3 - 5 wildland fires have positive and documented contact with appropriate incident management personnel and receive a briefing.	Yes
Provide fireline qualified individuals training on entrapment recognition and deployment protocols when such training has not been provided by the home/host Units.	Yes
Manage fatigue of personnel and ensure compliance with work/rest and length of assignment guidelines.	Yes
Personally conduct inspections for safety and health hazards, including compliance with the Ten Standard Fire Orders and mitigation of applicable Watch Out Situations.	Yes
Assign personnel to fireline positions for which they are qualified, as certified by their employing agency. Assign trainees per FSH 5109.17.	No
Include compliance with the Ten Standard Fire Orders and mitigation of applicable Watch Out Situations in after-action reports.	Yes
Monitor effectiveness of planned strategy and tactics. Immediately delay, modify, or abandon firefighting action on any part of a wildland fire where strategies and tactics cannot be safely implemented.	No
Ensure that performance ratings are completed on Type 3 - 5 wildland fires for all ground resources assigned from outside the local area.	Yes
On Type 1 - 3 wildland fires, accept no collateral duties except for unfilled command and general staff positions.	No
